

SPIDER MITE CONTROL

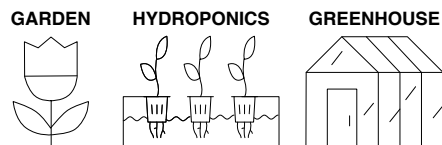

PEST PROBLEMS

HOW IT WORKS

SNS 217 & 217C kills spider mites & their eggs by coating them with an oily shield which prevents respiration. Mites dry out and die, and their eggs are prevented from hatching.

WHERE TO USE

SIZES AVAILABLE

Ready to Use

Concentrated

FIFRA 25(b)

products available **OMRI LISTED** 

Mixing Compatibility
 SNS **217c** + SNS **244c**

APPLICATION

Mixing 217C

Shake well before mixing. Mix 21 oz. of concentrate per gallon of water.

For best results use warm (70 degree) Distilled or "Chlorine Free" water.

Foliar Spray

Make sure to spray under the leaves where spider mites hide & lay their eggs. Do not use under direct sunlight or grow lamps.

Use 217 every 7-14 days for preventative maintenance.
